Professional Summary

Senior Frontend / Full Stack Developer with solid experience in developing scalable and high-performance web applications using JavaScript and TypeScript. Expert in the React, Next.js, and Vue ecosystems, operating with modern architectures (Micro-frontends, Design Systems, Clean Architecture, DDD, and SOLID) and integrating with Node.js (NestJS/Express) and PHP (Laravel) microservices. Proven track record in modernizing 100% of legacy systems, reducing critical interface load times by up to 83%, and increasing automated test coverage to 97% for global enterprise products. Strong technical background in agile environments, applying TDD, CI/CD, and Cloud technologies (AWS, GCP, and Vercel).

Technical Skills (Hard Skills)

- **Frontend:** React, Next.js, Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Micro-frontends, SPA, PWA.
- **State & Data Management:** Redux, Zustand, Context API, React Query (TanStack Query), Vuex, REST APIs, GraphQL.
- **Styling & UI/UX:** Tailwind CSS, Styled Components, Material UI (MUI), Shadcn/UI, Bootstrap, Storybook, Design Systems, Figma, Mobile-First, Web Accessibility.
- **Backend & Architecture:** Node.js, NestJS, Express, PHP, Laravel, C#, .NET, Microservices, Clean Architecture, DDD, SOLID, Clean Code, BPM.
- **Databases, Cache & Messaging:** PostgreSQL, MongoDB, Redis, Firebase, TypeORM, Prisma, Kafka, RabbitMQ.
- **Testing & Quality:** Jest, Vitest, React Testing Library (RTL), Cypress, TDD, SonarQube, ESLint.
- **DevOps, Cloud & Tools:** Docker, Docker Compose, AWS, Google Cloud Platform (GCP), Vercel, CI/CD, GitHub Actions, Azure DevOps, Git/GitHub, Scrum, Kanban.

Professional Experience

Senior Frontend Developer | NTT DATA (Client: Anheuser-Busch InBev) | Dec 2025 - Present

- Drove the continuous frontend evolution of a global enterprise system for InBev, utilized by over 1,000 employees across more than 20 countries.
- Optimized performance on critical screens featuring multiple heavy charts, reducing load times from 30 seconds to 5 seconds (-83%) and significantly enhancing the end-user experience.
- Elevated automated test coverage from 40% to 97% using Jest, Vitest, React Testing Library, and Cypress, validated with SonarQube, drastically reducing bugs and team rework.
- Actively participated in frontend architectural decisions, leading the standardization of reusable components and a Design System with Material UI and Storybook, alongside state management (Redux, Zustand, and React Query).
- Developed and refactored features in React and TypeScript, strictly applying Clean Code, SOLID principles, and TDD, increasing application readability, maintainability, and scalability.
- Collaborated directly with cross-functional teams (Product, Backend, and QA) in an agile environment utilizing CI/CD pipelines.

Full Stack Developer | Ticto | Dec 2024 - Nov 2025

- Developed and maintained SPAs, PWAs, and mobile-first responsive interfaces using React, Next.js, TypeScript, Tailwind CSS, and Styled Components to support an operation handling hundreds of thousands of accesses.
- Performed deep backend and database optimization (PHP, Laravel, Node.js, PostgreSQL, and Redis), restructuring critical queries that previously took 2-3 minutes to execute in mere milliseconds.
- Integrated high-availability REST APIs, GraphQL, microservices architecture, messaging queues (RabbitMQ/Kafka), and payment gateways (such as Stripe).
- Conducted Code Reviews, managed version control, and automated deployments using GitHub and CI/CD pipelines, ensuring high-quality deliveries in collaboration with Product Owners, QA, and Tech Leads within a Scrum framework.

Full Stack Developer | Centro Universitário da Grande Dourados | Sep 2022 - Dec 2024

- Provided technical leadership in the modernization of 100% of the institution's legacy systems to modern architectures using React, Next.js, Vue, and TypeScript, transforming application performance and usability.
- Developed and evolved Distance Learning (EAD) platforms utilized by over 6,000 students in Brazil, the US, Europe, and Japan, alongside internal systems for hundreds of employees.
- Built scalable and secure RESTful APIs using Node.js, NestJS, TypeORM/Prisma, and PostgreSQL, applying Clean Architecture and Domain-Driven Design (DDD) concepts.
- Implemented a quality-driven culture with unit testing (Jest) and code standardization (ESLint) within agile teams using Scrum and Kanban.

Junior Systems Development Analyst | Incorporadora São Bento | Oct 2021 - Sep 2022

- Created a Progressive Web App (PWA) using JavaScript, Vue, Vuex, and GraphQL for customer self-service (contracts, payments, and requests), reaching over 10,000 active users.
- Developed a comprehensive web portal used by approximately 300 brokers for sales management, documentation, and scheduling.
- Implemented and automated 100% of internal operational processes (5 main business workflows) using Business Process Management (BPM) and systems in C# and .NET, eliminating manual tasks.
- Standardized development and deployment environments using Docker and Docker Compose.

Web Developer (Intern) | Municipal Government of Naviraí | Feb 2019 - Dec 2019

- Completely redesigned the institutional portal using HTML, CSS, Bootstrap, and JavaScript, applying mobile-first concepts and web accessibility improvements that increased citizen engagement.
- Conducted requirements gathering and technical documentation to organize IT projects.

Education

- **Bachelor of Science in Software Engineering** | Centro Universitário da Grande Dourados (2023 - 2026)
- **Technical Degree in Web Development** | Federal Institute of Mato Grosso do Sul (2017 - 2019)

Languages

- **English:** Advanced
- **Portuguese:** Native
